IEG PI NOTICE

No. 40-76

TITLE/SIGNIFICANCE:

New-Type Probable R-100 Series Radio Van Truck

COMMENT: The new vehicle is a URAL-375 chamfered van truck with a probable Clothes Rail antenna (canvas-covered) mounted on the left side, an antenna mount on the right front of the van body, a canvas-covered rectangular box on the top center of the van body, and a box over the cab. This new vehicle is similar to the R-102M radio van truck which is used for division or higher net communications. We have observed from 11-17 of these vehicles at three HF RADCOM RCVR Stations in the Soviet Union and at an army barracks in Mongolia. Further sightings of this type of vehicle should be reported to the WGD Electronics Coordinator. Artist's concept on back.
